RECOMMENDATION

Accept staff presentation on status of trail and bikeway network development.

BACKGROUND

The City Council has adopted a 500-mile master plan for trails and bikeways that includes 100 miles of trails and 400 miles of on-street bikeways. The workplan for the Transportation and Environment Committee has included receiving staff reports that focus on the Trail Program typically in the Fall and on the On-Street Bikeway Program in the Spring.

Trail Program staff will provide a presentation on the status of Trail Network development including:

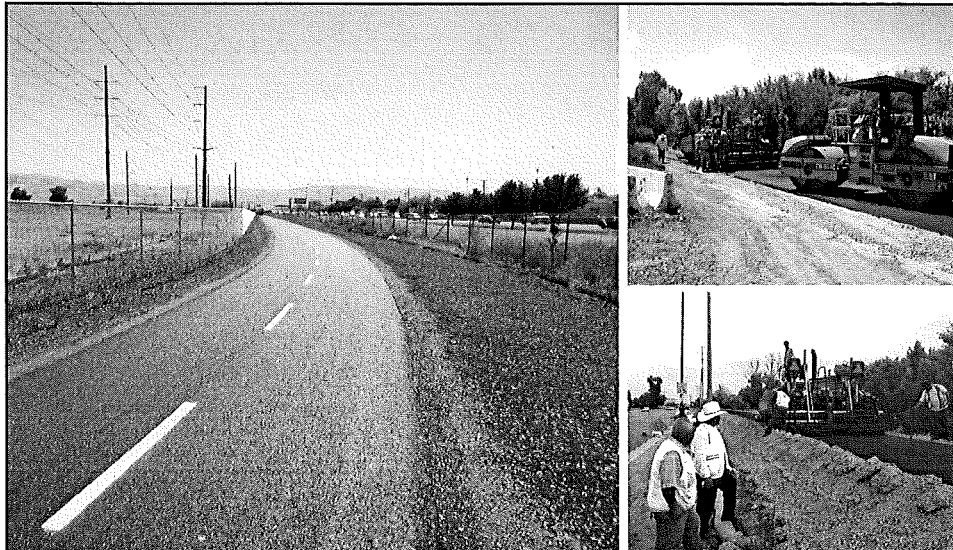

- Major projects in design or under construction
- Development of Smart Phone app for improved user experience
- Findings from this year's Trail Count
- Overview of Prioritization Process used for funding proposals and grant seeking

Staff managing the On-Street Bikeway Program will attend the meeting and be available for questions.
